# Inter System Specialists (ISS)

Inter System Specialists (ISS) offers a complete range of services in four related industries: interior fit-out systems, acoustic solutions, product supply and property development.

With over 100 years of combined experience in these fields, we have a deep understanding of industry needs and are able to deliver quickly without compromising on quality.

We pride ourselves on providing a complete service from start to finish, carrying out a complete specification to the clients request.

## Our Metal Stock

Our metal forms a light weight durable and very versatile framing system for partitions, linings and ceilings. It can offer benefits including enhanced acoustics and fire protection

C Stud & Track - 50mm / 70mm / 92mm / 146mm

MF Ceiling System - MF5 / MF6a / MF7  
25mm Angle

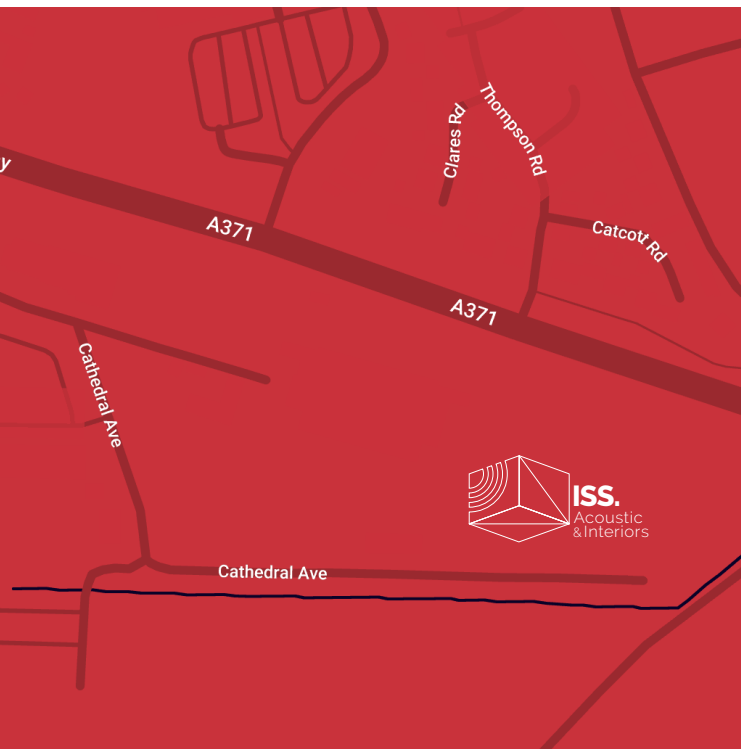

We also stock all the essentials like wall liner system, Resilient Bar, Angle etc.

## Introducing ISS Supply

ISS Supply was created to address the supply issues that many of us have encountered in the southwest region, where dry lining and interior supplies are often difficult to find, especially for specialist items we use regularly.

Our pickup service is located in Wells, Somerset, and provides everything you need for your dry lining and interior projects that you can't easily find at your mainstream builders merchant. To find out more about what's in stock, give us a call today at **01749676511**.
